

Template shapes-No-sew fabric building set  
Betsy Burnett- <http://aimhappy.blogspot.com>

Directions for using template:

Use shapes as a guideline for creating your own building set. Copy and cut out shapes. Trace shapes onto stiffened fabric. Dark lines on shapes are cut lines. The cut lines will enable you to join the shapes together. For stability never cut beyond the middle point of the shape. With some fabrics due to thickness a slight “wedge” cut works best. In that case, make sure the wedge is wider at the outside of the shape. Start narrow and gradually increase the wedge until you find a size that works for you.

All shapes and cut lines are suggestions of possible shape/cut line combinations. Experiment with your own ideas for the possibilities are endless.

Happy Building!
